

SCOR® PROFESSIONAL TRAINING: THOROUGH, EFFECTIVE, SKILLS DEVELOPMENT

SCOR® Professional training drives measurable supply chain process improvement through education, content and knowledge that provides an in-depth understanding of the Supply Chain Operations Reference (SCOR®) model, widely recognized as the global standard for supply chain management.

OVERVIEW

SCOR Professional training introduces attendees to the full scope and contents of the SCOR model. Participants learn the major components (Performance, Process, Practices, and People) and how to describe and characterize supply chains using SCOR.

SCOR Professional Training

During the three-day, instructor-led interactive SCOR Professional training session, participants can expect group discussion and individual exercises to encourage active learning. Participants learn about SCOR process nomenclature, process metrics, and process practices in a systematic manner to enable mastery of:

Supply chain processes – Supply chains are described using the standard SCOR processes (Plan, Source, Make, Deliver, Return, and Enable). Process training delves into each component. Process education also addresses process modeling.

Supply chain performance metrics – SCOR metrics describe and address reliability, responsiveness, agility, cost and asset efficiency. The application of metrics and supply chain benchmarking is discussed.

Supply chain practices – Process maturity is examined and class participants are trained on how to assess supply chain activities and apply best practices.

Supply chain people Skills – The SCOR model offers insight on organizational design and the people skills and competencies required for successful supply chain operation.

In addition to learning about the SCOR model and its application, the class will investigate a SCOR project case study.

Participants receive a copy of the SCOR model, a SCOR *Quick Reference Guide* and a SCOR *Professional Training Participant Workbook*.

In addition, by attending this class participants will:

Understand how successful companies apply SCOR – Learn about the typical deliverables recommended for projects and how to use SCOR to improve supply chain and business performance.

Learn how to organize projects – Every supply chain project is different, yet all projects are similar. The SCOR Roadmap offers a standardized way to address a variety of supply chain projects in an organized manner.

Build credibility – The ability to manage projects with predictable outcomes—improvement in performance and reliable processes—increases your team's credibility with senior management and other departments.

SCOR® PROFESSIONAL TRAINING

Highly Qualified Instructors

The SCOR training program is led by instructors who are formally qualified by APICS. They hold the SCOR-P endorsement, possess in-depth SCOR experience and are deeply knowledgeable in all functions of supply chain operations (Plan, Source, Make, Deliver, Return, and Enable).

SCOR-P Endorsement

The SCOR Professional (SCOR-P) endorsement program establishes a global standard of excellence for applying SCOR. The designation provides a practical method for assessing the skills and competencies of supply chain professionals and a method for evaluating the effectiveness of training. For more information, visit apics.org/scor-p.

Pricing and Venues

APICS authorized SCOR channel partners offer SCOR training to both members and nonmembers. Special pricing is available for APICS members, government entities and APICS Supply Chain Council Affiliates and Sponsors.

Training arrangements can be facilitated through APICS authorized SCOR channel partners.

Group Training

SCOR training courses can be taught at your facility. Group training combines individual learning, customized examples and team development. For more information please contact an authorized APICS SCOR-P channel partner.

About APICS

APICS is the leading professional association for supply chain and operations management and the premier provider of research, education and certification programs that elevate supply chain excellence, innovation and resilience. APICS Certified in Production and Inventory Management (CPIM), APICS Certified Supply Chain Professional (CSCP) and APICS Supply Chain Operations Reference Professional (SCOR-P) designations set the industry standard. With over 41,000 members and more than 250 international partners, APICS is transforming the way people do business, drive growth and reach global customers.
